# Solutions for Rolling Shutters

Comfort first!

HOME  
MOTION BY

somfy®

**SOMFY**, the french manufacturer, designs and develops motors and controls for openings and closures of homes. All Somfy solutions have the same aim: to offer their users comfort and security while making life easier at home. **All SOMFY motors are guaranteed for 5 years.**

Rolling shutters offer style, security and sun protection in any home. Add to that, they alter the shading of your room and offer complete privacy whenever you desire. During hot months, they'll keep your home cooler, by reducing glare and heat from the sun. Rolling shutters are also great at reducing outside noise.

## **Install a SOMFY motor and control system to operate your rolling shutters, and you will enjoy:**

### **➤ Greater convenience:**

Make opening and closing a comfort factor: open and close your shutters with a simple touch of a button - from your bed in the morning or anywhere in your home whenever you want to! Forget the labor intensive work trying to wind or pull your shutters up or down.

### **➤ Greater durability:**

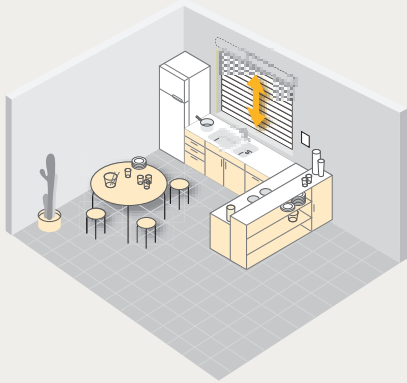

Replacing manual handling with smooth motorized control means your shutters are handled less roughly, are never forced or wound past the correct top or bottom positions and ultimately, have an extended life span.

### **➤ Energy efficiencies:**

By installing a timer or sensor, you can allow your rolling shutters to open and close automatically according to set times or weather patterns. Motorized rolling shutters reduce heat loss from a bay window by 15 to 20% in winter and can shade your home from direct sunlight all year round.

# SOMFY control options for rolling shutters

## Individual control

### Operate just one shutter at a time

It's easy to operate your rolling shutter. One button lowers the shutter, another raises it, and the middle button stops it. You can even use the remote control to operate your shutter from anywhere in or around your home.

## Master control

### Control your shutters as you wish

The central control point and the multi-channel remote control allow you to control your shutters in unison or separately. Telis 4 RTS combines the flexibility and convenience of remote control with individual, grouped and centralized control for your shutters.
